Skills

- Leadership | Project Management | Scrum | OKR | Agile | Confluence | Azure | AWS | Excel
- Linguistic Analysis | Phonetics | Translation | Localization | TTS | Git | Python | SSH | Regex
- ML | Neural Networks | NLU/NLP | Pandas | Scikit Learn | Seaborn | Numpy | SQL | Elasticsearch
- Chatbot Development | User Experience (UX) | User Testing

Professional experience

Clarice.ai (2024 - present) Technical Project Manager & Main Researcher

- **Conceived and developed** the project plan, including timelines, scope, resource allocation, and team composition for a **24-month AI development initiative**.
- Leading cross-functional teams using a hybrid **Waterfall and Scrum** approach to deliver milestones efficiently.
- Driving the design and fine-tuning of a **proprietary Large Language Model (LLM)** to enhance accuracy, personalization, and stylistic control.
- Developing **heuristic-based linguistic rules** for Portuguese and Spanish, expanding the model's linguistic and stylistic scope.
- Overseeing data pipelines and leveraging **reinforcement learning** from user interactions to improve model performance.
- Securing funding through detailed grant proposals and strategic planning, while ensuring compliance with intellectual property standards.
- Positioning the project for **global scalability**, with plans for international market expansion.

PPH (2023 - 2024) Machine Learning Specialist (TTS)

- Contribute to the development of a cutting-edge Text-to-Speech application at a leading tech company.
- Conducted in-depth linguistic, phonological, and phonetic analyses to optimize model performance and achieve accurate Brazilian Portuguese naturalness.
- Implemented rigorous QA processes for linguistic data, including script proofreading, recording quality control, and phonemic transcription verification.
- Assessed synthesis quality, identify key performance indicators, and propose data-driven strategies to enhance model output.
- Collaborated with engineering teams to develop proprietary tools for addressing prosodic, phonemic, and morphosyntactic challenges.
- Participated in the testing and evaluation of new Machine Learning systems, providing valuable insights for model refinement.
- Adapted content and scripts to maintain syntactic structure while achieving natural and pragmatic Brazilian Portuguese.
- Developed and refine guidelines for linguistic consultants to improve data consistency and quality.

Apple (2018 – 2024) - Technical Project Manager | Language Engineer (contractor)

- Led initiatives within Scrum teams to enhance engineering support and streamline documentation processes. My role encompassed a blend of leadership, technical expertise, and strategic planning.
- Led and co-led critical projects, driving success through meticulous planning, risk assessment, and mitigation strategies. Worked closely with stakeholders to align the product vision and ensure deliverables met their expectations. Implemented OKRs to drive excellence and integrated elements of both Scrum and Waterfall methodologies to ensure timely and efficient project delivery.

- Fostered a collaborative environment, refining User Stories and monitoring performance metrics to facilitate effective sprints. Addressed and resolved impediments and dependencies to maintain sprint velocity.
- Managed and optimized Text-to-Speech (TTS) systems for Brazilian Portuguese and other languages. Increased the product's MOS (Mean Opinion Score) from **3.8** to **4.63** using Tacotron without introducing regressions. Further optimized the system by maintaining high MOS scores while enhancing prosody, audio quality, and **reducing asset sizes by 40%** with FastSpeech2.
- Developed various products using **Machine Learning** and **Deep Learning** models, leveraging technologies such as Python, PyTorch, TensorFlow, and Docker.
- Conducted in-depth analysis of quality metrics and data to drive model improvements and performance enhancements. Utilized automated data processing workflows and quality assurance processes, employing Git, Bash scripting, Regex, and AWS.
- Assisted in updating and monitoring tools for linguistic and NLP tasks, including debugging, automated testing, and data generation. Engaged in research and development projects to advance TTS capabilities and explore innovative solutions.

TRIAD (2017 - 2018) - Language Engineer | UX Writer

- Utilized an iterative approach to develop NLU training strategies for Microsoft's LUIS and QnA Maker, continuously improving chatbot accuracy and responsiveness through user testing and feedback.
- Managed and prioritized the expansion of training data using a Kanban-like system, ensuring diverse responses and improved user intention comprehension.
- Proactively monitored and adapted chatbot behavior to align with evolving client needs and product requirements.
- Collaborated closely with cross-functional teams (e.g., development, design) using regular meetings or communication channels (e.g., daily stand-ups) to ensure user-centric content alignment throughout the development cycle.
- Developed precise and concise microcopy in alignment with sprint goals, ensuring seamless user interface guidance.
- Conducted user research and actively participated in user testing to refine content iteratively, enhancing clarity and effectiveness.

Amazon (2017) - Voice Coach | Studio Leader (contractor)

- During first month, I worked on-site in Gdansk, Poland, then in São Paulo, Brazil. Delivered meticulous phonetically-driven feedback to voice talent artists participating in the recording of voice prompts for a Text-to-Speech (TTS) system.
- Responsibilities included evaluating the phonetic quality of voice recordings, promptly identifying transcription errors, and providing real-time feedback to enhance the overall recording quality.
- Served as a linguistics consultant, actively involved in tasks such as creating, localizing, and translating actions, messages, and responses.
- Performed detailed reviews to identify errors and generated comprehensive reports for the team in Gdansk.

Google (2016 - 2017) - Linguist (contractor)

- Analyzed voices, expanded texts, and adjusted intonation through an iterative process, continuously refining voice quality based on user feedback and testing.
- Created and maintained a Style Guide for Brazilian Portuguese, prioritizing tasks to ensure consistency and quality across voice elements.
- Proactively monitored and addressed errors in synthesized audio, rectifying issues promptly for an optimal user experience.
- Collaborated with teammates to create and implement accurate messages for the Assistant, ensuring clear and consistent voice interactions.

- Contributed to NLP data derivation for new and ongoing projects in alignment with sprint goals, ensuring the availability of accurate linguistic resources.
- Annotated linguistic elements and provided alternative syntactic structures, iteratively improving the machine's language patterns and grammatical proficiency based on user data and testing.
- Actively participated in training programs like data review and annotation, continuously learning and improving skills for ongoing NLP development.

CAPES (2014 - 2016) - CAPES Researcher

- Event Management: Organized and participated in events, showcasing partial Master's research results.
- Research Support: Collected and processed data, contributing to the organization of the Institute's corpus.
- Research Collaboration: Actively participated in the GEFONO research group.
- Master's Thesis: Completed a Master's dissertation.

Education (the most relevant)

2025 - 2026 **MBA in Project Management**; USP/Esalq; In progress

2022 - **Degree in Artificial Intelligence**; FIAP; Earned certification of Machine Learning and Cognitive Services in December 2022

2014 - 2016 **Master's Degree in Linguistics**; Federal University of Uberlândia, Brazil; Earned the degree Master of Linguistic Studies in February 2016

2006 – 2011 **Degree in Languages** Portuguese/English and respective literatures; Federal University of Uberlândia, Brazil; Earned the degree in 2011

Professional training (relevant to expertise)

2023 Certification: **Professional Scrum Master™ I (PSM I)**

2023 On-line Course (11th to 14th of December): **Professional Scrum Master Course**

2023 On-line Course (certificate): **Confluence Fundamentals Badge**

2023 On-line Course (certificate): **Get started with Jira**

2023 On-line Course (certificate): **Kanban complete from A to Z**

2023 On-line Course (certificate): **The Project Management Course**

2022 Presencial (certificate): **Cognitive Services (Data Analysis)**

2022 Presencial (certificate): **Machine Learning**

2020 Presencial (certificate): **Python**

2018 On-line Course (certificate): Aprendendo terminal **Linux** pondo a mão na massa!
