

Guilherme Antônio Silva

São Paulo, SP, Brazil | +55 (11) 91162-2214 | gasguiantony@gmail.com | **LinkedIn** | **Portfolio**

Professional Summary

Technical Project & Product Manager with 8+ years of experience at Apple, Google, Amazon, Clarice.ai and TrustScale. Specialized in AI/ML (LLMs, TTS, NLP/NLU), Agile project delivery, and cross-functional leadership. Proven ability to manage global teams (up to 1,300+ contributors), drive scalable AI initiatives, and deliver high-impact products with measurable technical improvements. Seeking a role in Product/Project/Technical Program Management driving innovation in AI and user-centric systems.

Core Skill

Project & Product Management: Agile/Scrum (PSM I), Waterfall/Hybrid, OKRs, Roadmapping, Backlog Prioritization, Risk Management, Stakeholder Alignment, Confluence, Jira, Azure DevOps.

AI/ML: LLM Fine-tuning, RLHF, NLU/NLP, TTS (Tacotron, FastSpeech2), Deep Learning, Neural Networks, Data Augmentation, Model Evaluation (MOS), TensorFlow, PyTorch.

Technical: Python (Pandas, NumPy, Sklearn), SQL, Docker, Git, Bash, AWS, Data Pipelines, A/B Testing.

Linguistics & UX: Linguistic Annotation, Localization, Semantic/Phonetic Analysis, VUI/UX Writing, Style Guides.

Professional Experience

TrustScale.ai | Remote AI Project Manager | (2025 - Present)

- Led cross-functional teams of 1,300+ contributors (DAs, Reviewers, QA/QC, agencies) across multi-locale, high-volume AI initiatives.
- Improved project quality from 80% → 90% in week 2 and drove teams toward 96%+ accuracy, using coaching, standardization, and Agile workflows.
- Delivered daily and weekly batches on time and within scope, meeting strict SLAs.
- Drove alignment across Engineering, QA, Delivery, and Operations, ensuring seamless execution.
- Led stakeholder and client meetings, resolving blockers and negotiating priorities.
- Conducted Quote Meetings defining cost structures, throughput, margins, and feasibility.
- Implemented Agile/Scrum processes and optimized standards to reduce rework and increase operational efficiency.

Clarice.ai | São Paulo, SP Technical Project Manager & Main Researcher | (2024 - 2025)

- Managed a 24-month AI development roadmap, defining scope, timelines, and resources.
- Led hybrid Waterfall/Scrum execution across engineering, linguistics, and product teams.
- Directed the design, fine-tuning and RL-based improvement of a proprietary LLM.
- Built linguistic heuristics for Portuguese/Spanish to expand stylistic and grammatical control.
- Developed the project architecture and proposal that was approved by FAPESP, securing 2 years of funding for the company to run the initiative. [\[Project on GitHub\]](#)

Apple | Cupertino, CA (Remote) Technical Project Manager | Language Engineer (Contractor) | (2018 – 2024)

- Led multidisciplinary teams (Producers, Language Engineers, QA, Devs) driving quality, documentation, and engineering workflows.
- Managed Jira workflows with custom automation, Bitbucket integration, Agile ceremonies, and delivery metrics (Velocity, Cycle Time, Burndown).
- Guided transition from Waterfall → Hybrid Agile model, improving predictability and delivery pace.
- Improved Brazilian Portuguese TTS quality by 21% (MOS 3.8 → 4.63) using Tacotron, PyTorch, hyperparameter tuning, and neural augmentation.

- Reduced TTS asset size by 40% while maintaining high MOS.
- Increased training data by 10–15% using automated NN-based data augmentation.
- Optimized GPU and compute usage with task prioritization and workload balancing.
- Created and maintained global onboarding materials and best-practice guidelines for engineering teams.

PPH | Remote Linguist Machine Learning Specialist (TTS) (Contractor) | (2023 - 2024)

- Improved PT-BR TTS quality via detailed linguistic analysis, phonetic QA and collaboration with engineering teams.

TRIAD | Language Engineer | UX Writer (Contractor) | (2017 - 2018)

- Developed NLU training data (LUIS/QnA Maker), improving chatbot accuracy and authoring UX microcopy.

Amazon | Voice Coach | Studio Leader (Contractor) | (2017)

- Provided phonetic coaching for TTS recordings and contributed to PT-BR localization quality.

Google | Linguist (Contractor) | (2016 - 2017)

- Improved Google Assistant synthetic voices and wrote the official PT-BR style guide.

CAPES | Uberlândia, MG CAPES Researcher | (2014 - 2016)

- Master's research in Linguistics (phonetics, phonology, data analysis).

Education

- **MBA in Project Management** | USP/Esalq | (In Progress: 2025 - 2027)
- **Degree in Artificial Intelligence** | FIAP | 2022 (Certified in Machine Learning & Cognitive Services)
- **Master's Degree in Linguistics** | Federal University of Uberlândia | 2016
- **Degree in Languages** (Portuguese/English) | Federal University of Uberlândia | 2011

Certifications & Professional Training

- Professional Scrum Master™ I (PSM I) | Scrum.org | 2023
- Confluence Fundamentals | Atlassian | 2023
- Jira Fundamentals | Atlassian | 2023
- Selected Relevant Training: Kanban A-Z (2023), Project Management Course (2023), Cognitive Services (2022), Machine Learning (2022), Python (2020)
