

Guilherme Antônio Silva

São Paulo, SP, Brazil | +55 (11) 91162-2214 | gasguiantony@gmail.com | [LinkedIn](#) | [Portfolio](#)

Professional Summary

Technical Project & Product Manager with 8+ years of experience bridging Linguistics, AI/Machine Learning (TTS, NLU, LLM), and Software Development in global tech giants like Apple and Google. Proven ability to lead cross-functional teams, manage complex projects using Agile and Waterfall methodologies, and deliver results that enhance user experience and system performance. Seeking a challenging Product/Project Management role focused on driving innovation in technology solutions.

Skills

- Project & Product Management: Agile Methodologies (Scrum Master Certified - PSM I), Waterfall, Hybrid Approaches, OKR Implementation, Roadmapping, Backlog Prioritization, Prioritization Techniques (e.g., MoSCoW, Value vs. Effort), Stakeholder Management, Risk Assessment & Mitigation, Resource Allocation, Project Planning & Execution, Confluence, Jira, Azure DevOps.
- AI / Machine Learning: Natural Language Understanding (NLU), Natural Language Processing (NLP), Text-to-Speech (TTS - Tacotron, FastSpeech2), Large Language Models, Deep Learning Model Training & Fine-tuning, Neural Networks, Tensorflow, PyTorch, Data Augmentation, Model Evaluation (MOS), MLOps.
- Technical & Data Analysis: Python (Pandas, Numpy, Scikit-learn, Seaborn), SQL, Git, Docker, Bash Scripting, Regex, Elasticsearch, AWS, Data Pipelines, Data Scraping, A/B Testing, QA Processes, User Testing.
- Linguistics & UX: Linguistic Analysis/Annotation (Phonetics, Phonology, POS, Syntactic Parsing, Semantic Parsing), Localization, Translation, Chatbot Development, User Experience (UX), UX Writing, Voice User Interface (VUI) Design.

Professional Experience

Clarice.ai | São Paulo, SP *Technical Project Manager & Main Researcher* | (2024 - Present)

- Developed and manage the comprehensive project plan (scope, timeline, resources) for a 24-month AI development initiative.
- Lead cross-functional teams using a hybrid Waterfall/Scrum framework to deliver project milestones efficiently.
- Drive the design, fine-tuning, and performance improvement of a proprietary LLM using reinforcement learning and user interaction data.
- Develop heuristic-based linguistic rules (Portuguese/Spanish) to expand the model's linguistic scope and stylistic control.
- Successfully secured project funding through detailed grant proposals and strategic planning.

Apple | Cupertino, CA (Remote) *Technical Project Manager | Language Engineer (Contractor)* | (2018 – 2024)

- Led cross-functional teams, including Producers, Language Engineers, Developers, and QA specialists—through initiatives focused on improving engineering support, product quality, and documentation workflows.
- Managed team workflows in Jira by customizing boards to reflect specific project stages—such as To Do, Doing, Testing, QAing, and Release—along with automation rules and Bitbucket integration to improve tracking. Ran Scrum events, refined user stories, and tracked Velocity, Burndown, and Cycle Time.
- Guided the team's transition from Waterfall to a hybrid Scrum/Waterfall model, adapting tooling by integrating Agile features into the existing bug tracker and facilitating the required team mindset shift. Adjusted sprint length and routines based on team feedback to improve pace and delivery predictability.

- Improved Brazilian Portuguese TTS quality by **over 21%**, increasing Mean Opinion Score (MOS) from **3.8 to 4.63** using Tacotron, strategically selecting PyTorch over Tensorflow and optimizing hyperparameters through extensive comparative testing.
- Enhanced TTS system efficiency by maintaining high MOS scores while **reducing asset sizes by 40%**.
- Increased training data by **10–15%** using neural network-based data augmentation, improving model robustness.
- Drove TTS model improvements by analyzing quality metrics and leveraging automated data processing workflows (Python, Git, Bash, Regex, AWS).
- Oversaw responsible resource usage by prioritizing GPU-intensive tasks and crowdsourced testing based on project phase. Implemented queueing systems and workload balancing across teams to ensure efficient infrastructure usage and reduce unnecessary costs.
- Worked closely with leadership and cross-functional teams to resolve conflicts, manage priorities, and keep delivery on track despite changes in scope or technical direction.
- Produced documentation and best practices for global linguist onboarding and model evaluation.

PPH | Remote *Linguist Machine Learning Specialist (TTS) (Contractor)* | (2023 - 2024)

- Optimized TTS model performance for Brazilian Portuguese through in-depth linguistic analysis and rigorous QA processes.
- Collaborated with engineering teams to develop proprietary tools addressing prosodic and morphosyntactic challenges in speech synthesis.

TRIAD | São Paulo, SP *Language Engineer / UX Writer (Contractor)* | (2017 - 2018)

- Developed and iterated on NLU training strategies (Microsoft LUIS/QnA Maker), improving chatbot accuracy based on user testing.
- Managed training data expansion using Kanban, enhancing user intention comprehension.
- Collaborated with development and design teams to create user-centric chatbot content and microcopy.

Amazon | Gdansk, Poland & São Paulo, SP *Voice Coach / Studio Leader (Contractor)* | (2017)

- Provided expert phonetic feedback to voice talent for TTS recordings, ensuring high-quality audio output.
- Served as a linguistics consultant for localization and translation tasks, identifying and correcting errors.

Google | São Paulo, SP *Linguist (Contractor)* | (2016 - 2017)

- Analyzed and refined synthesized voices through iterative testing and user feedback for Google Assistant.
- Created and maintained the Brazilian Portuguese Style Guide and contributed to NLP data derivation and annotation.

CAPES | Uberlândia, MG *CAPES Researcher* | (2014 - 2016)

- Conducted Master's research in Linguistics, including data collection/processing and event participation within the GEFONO research group.

Education

- MBA in Project Management | USP/Esalq | (In Progress: 2025 - 2027)
- Degree in Artificial Intelligence | FIAP | 2022 (*Certified in Machine Learning & Cognitive Services*)
- Master's Degree in Linguistics | Federal University of Uberlândia | 2016

- Degree in Languages (Portuguese/English) | Federal University of Uberlândia | 2011

Certifications & Professional Training

- Professional Scrum Master™ I (PSM I) | Scrum.org | 2023
- Confluence Fundamentals | Atlassian | 2023
- Jira Fundamentals | Atlassian | 2023
- *Selected Relevant Training:* Kanban A-Z (2023), Project Management Course (2023), Cognitive Services (2022), Machine Learning (2022), Python (2020)
